

## The new progressive distributors for filling and packaging industries

- ✓ precise
- ✓ modular
- ✓ corrosion-resistant

**AND 100% COMPATIBLE**

BEKA FoodLine progressive distributors are  **BEKA**FOODLINE

**PRECISE**  
**MODULAR**  
**COMPATIBLE**

...because the metering quantity is defined very exactly. Each lub point receives the ideal amount of lubricant.

...to use. Metering quantities and number of lube points can be modified at any time!

...for 100%, therefore no modifications in case of exchange, replacement or integration in the design of the machine!

Caused by their modular design, BEKA progressive distributors are very flexible to use. **In contrast to inflexible block distributors, later modifications and extensions of modular distributors are always possible.** Although the output rate of block distributors with metering screws can be adjusted, later extensions are not possible.

**Only a progressive distributor with sequential control guarantees constant output.** Block distributors with metering screws normally operate with the parallel piston system with which it is not possible to monitor the actual output.

### It's your own decision:

Conventional rigid block design OR modern + flexible distributor variations for highest comfort concerning metering, functionality and materials together with an excellent price/performance ratio!

## V4A MX-1

STAINLESS STEEL

- **MOST COMPACT INOX DISTRIBUTOR** on the market
- Ideal with **RESTRICTED** space conditions
- As standard in **V4A** (1.4404) **WITHOUT SURCHARGE** to **V2A**
- **MODULAR CONZEPTION** in segmental design with a high number of metering rates in one distributor
- Excellent **PRICE/PERFORMANCE RATIO**

## V4A LX-3

STAINLESS STEEL

- The **NEW DISTRIBUTOR in INOX** - optimal suitable for beverage and packaging industries
- As standard in **V4A** (1.4404) **WITHOUT SURCHARGE** to **V2A**
- **100% COMPATIBLE DIMENSIONS** and **DELIVERY RATES** to comparable block distributors
- **MODULAR FLEXIBILITY** by segmental design and elements with up to 3 different metering quantities
- **COMPACT DIMENSIONS** even with different output rates

## ZnNi LX-4

ANTI CORROSIVE PROTECTION

- **HIGH CORROSION PROTECTION** (720 h RR) - ideal solution, if INOX is not really necessary
- Very attractive **PRICE LEVEL**

Our specialists will be pleased to inform you!
